

AAPLOG Action National Statement

The American Association of Pro-Life OB/GYNs (AAPLOG Action) supports efforts to restore life-affirming medicine as the standard of healthcare in America in every state. Colorado currently remains one of the few places in the world with virtually no legal limits on abortion throughout pregnancy, while laws such as the Reproductive Health Equity Act (RHEA) prevent any regulations and reporting requirements for second and third trimester abortion facilities. As physicians committed to caring for both women and their preborn children, we believe that every patient deserves high standards of medical care, accurate public health data, and legal protections that promote accountability. We support repealing Amendment 79 and championing policies that uphold the dignity and value of every human life, remove taxpayer funds from abortion, and ensure that Colorado's healthcare laws prioritize the well-being of both born and preborn patients.
